## Outline of Business

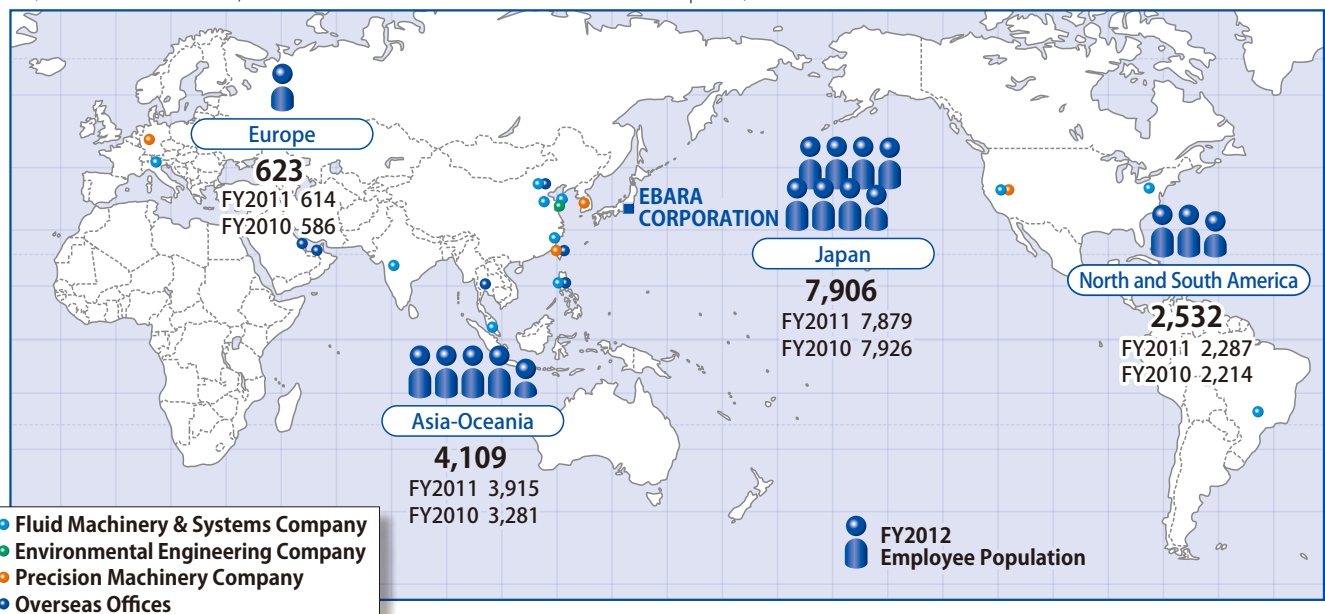

EBARA, established in 1912, has grown to become one of the world's principal manufacturers of industrial machinery with fluid machinery and systems such as pumps and compressors. And, EBARA has expanded into the environmental engineering business with incineration and gasification technology and water treatment technology at its core, and further into the precision machinery business handling semiconductor manufacturing equipment and other products. The EBARA Group is constantly thinking of what will be required in the future and is seeking to accurately grasp the current and future needs of its customers, while it continues to pursue the development of superior technologies and products in all its businesses. In the years to come, as in the past, the EBARA Group will continue to achieve further development and contribute to society by excelling in the development of technologies as well as the manufacturing and marketing of products, and by providing high-quality support and services.
