Results Presentation for FY2025 Ended December 31, 2025

EBARA (6361)

February 13, 2026

Looking ahead,
going beyond expectations
Ahead > Beyond

EBARA CORPORATION

Ochiai: Thank you very much for attending today's briefing on EBARA Corporation's financial results for the fiscal year ended December 31, 2025, and the new long-term vision and medium-term management plan.

We will now begin the briefing. Documents related to the financial results were disclosed on the TSE platform and our website at 15:30 today, so please have them ready at hand if necessary.

Let me introduce the attendees from our company. Shugo Hosoda, President, Representative Executive Officer.

Hosoda: I am Hosoda. Thank you.

Ochiai: Isao Nambu, President, Precision Machinery Company.

Nambu: I am Nambu. Thank you.

Ochiai: Takano Miyaki, President, Energy Company.

Miyaki: I am Miyaki. Thank you very much.

Ochiai: Shu Nagata, President, Building Service & Industrial Company.

Nagata: I am Nagata. Thank you.

Ochiai: Teruyuki Ota, President of Infrastructure Company.

Ota: I am Ota. Thank you.

Ochiai: Hideki Yamada, President, Environmental Solutions Company.

Yamada: I am Yamada. Thank you.

Ochiai: Tetsuya Fuchida, CFO, Executive Officer in charge of IR.

Fuchida: I am Fuchida. Thank you.

Ochiai: I, Ochiai from the Investor Relations and Public Relations Division, will be the moderator. Thank you.

Today, CFO Fuchida will begin with an overview of the financial results, followed by President Hosoda's outlook for the current fiscal year. A Q&A session will follow to answer any questions regarding the financial results and outlook for the current fiscal year. After the Q&A session, President Hosoda will explain the new medium-term management plan and again take your questions. The end time is scheduled for 18:00. You can listen to today's meeting via Zoom on demand. Details will be emailed to you after the meeting.

Now, Mr. Fuchida will explain.

Topics

FY25 Results (YoY comparison)

- Orders, revenue, operating profit, and profit attributable to owners of parent all reached record highs
- Revenue up in all segments. Operating profit increased overall, due to contributions from Precision Machinery, Environmental Solutions, and Infrastructure, and the absence of the goodwill impairment loss recorded last year by Building Service & Industrial

FY26 Forecast

- We aim to achieve orders and revenue over ¥1 trillion for the first time, and achieve record levels of operating profit and profit attributable to owners of parent for the 6th straight period

Shareholder Returns

- Annual dividend per share has been raised from the previous forecast of ¥56 to ¥59. The plan for FY26 is ¥66
- We purchased ¥20 billion treasury shares in FY25. We have set a ¥10 billion limit for repurchase of treasury shares for FY26

3 Copyright© Ebara Corporation. All rights reserved.

Fuchida: I am Fuchida, CFO, Executive Officer in charge of IR. First, I would like to explain the key points of the financial results.

For FY2025, orders, revenue, operating profit, and profit attributable to owners of parent all exceeded those of the previous fiscal year, marking the fifth consecutive period of record performance. FY2025 was the final year of the three-year medium-term management plan, E-Plan 2025, and one of steady progress.

Revenue increased in all segments. Operating profit increased in precision machinery, environmental solutions, and infrastructure, and building service and industrial did not have the goodwill impairment losses recorded in the previous fiscal year in building service and industrial, boosting operating profit YoY.

With respect to the forecast for FY2026, we aim to achieve the highest performance for the sixth consecutive fiscal year. Regarding dividends, based on the policy of a dividend payout ratio of 35% or more, we plan to raise the annual dividend to JPY59 per share for FY2025 and JPY66 per share for FY2026. With respect to share repurchases, following the repurchase of JPY20 billion in FY2025, the Company has set a limit of JPY10 billion for the repurchase of treasury stock in FY2026.

The above is a summary of the financial results.

1. FY25 Summary of Results

2. FY25 Results by Segment

3. FY26 Forecast

4. Appendix

I will now move on to a detailed explanation of the financial results.

1. FY25 Summary of Results Consolidated

| (billions of yen) | FY24 1-4Q Results a | FY25 1-4Q Results b | YoY | | FY25 1-4Q Plan Nov/13/25 c | Results vs. Plan | |

^{*1} Figures reflect the 5-for-1 stock split executed July 1, 2024.

^{*2} Exchange rates are simple averages of the average rate of each quarter.

See page five. I will explain our consolidated results for the full year of FY2025 compared to the previous year's results. Orders received were JPY949.6 billion, revenue was JPY958.2 billion, operating profit was JPY113.8 billion and profit attributable to owners of parent was JPY76.6 billion. All items exceeded the plan announced in November 2025.

6 Copyright© Ebara Corporation. All rights reserved.

Page six is a summary of financial results by segment.

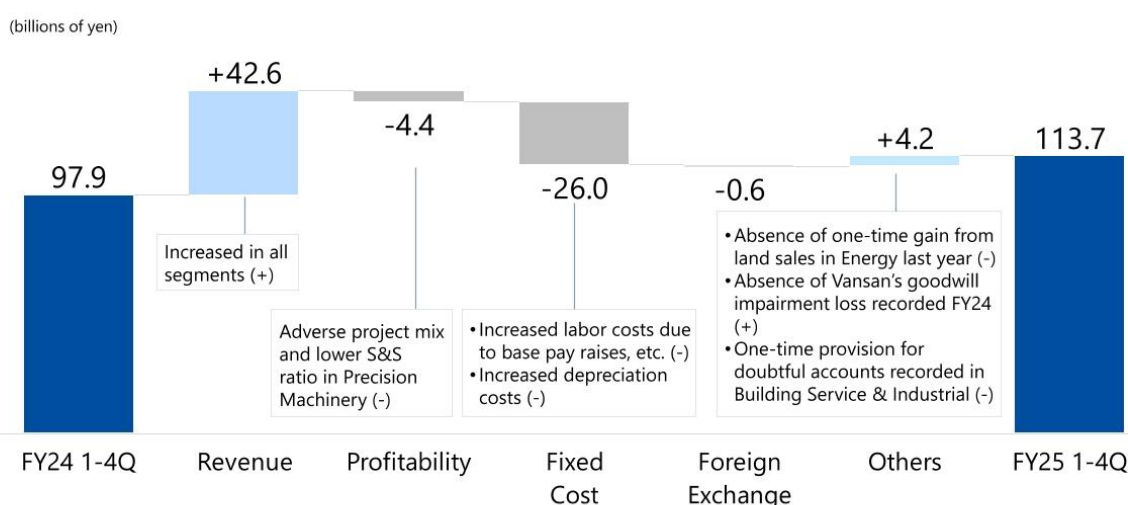

Orders increased by JPY89.1 billion from the previous fiscal year, as orders in the environmental solutions and precision machinery segments offset a decline in the energy segment. Revenue was solid in all segments, increasing by JPY91.6 billion from the previous year. Operating profit increased by JPY15.8 billion from the previous year, with increases in all segments except energy.

1. FY25 Summary of Results

Breakdown of Changes in Operating Profit

Revenue growth outpaced increases in fixed costs, resulting in higher operating profit

7 Copyright© Ebara Corporation. All rights reserved.

Shown here is an analysis of changes in operating profit from the previous year. The major factors of increase or decrease are revenue and fixed costs. Other one-time factors include the fact that the goodwill impairment

loss related to Vansan in Turkey, which was recorded in the previous year in building service and industrial, did not occur in the current year.

1. FY25 Summary of Results

Revenue by Region

"Revenue by Region" indicates revenue on the basis of the geographical location where the goods are sold

8 Copyright© Ebara Corporation. All rights reserved.

Page eight shows the revenue composition by region. Overseas revenue accounts for almost two-thirds of total revenue, as shown in the pie chart on the right. The composition of domestic and overseas revenue remained almost unchanged from the previous fiscal year.

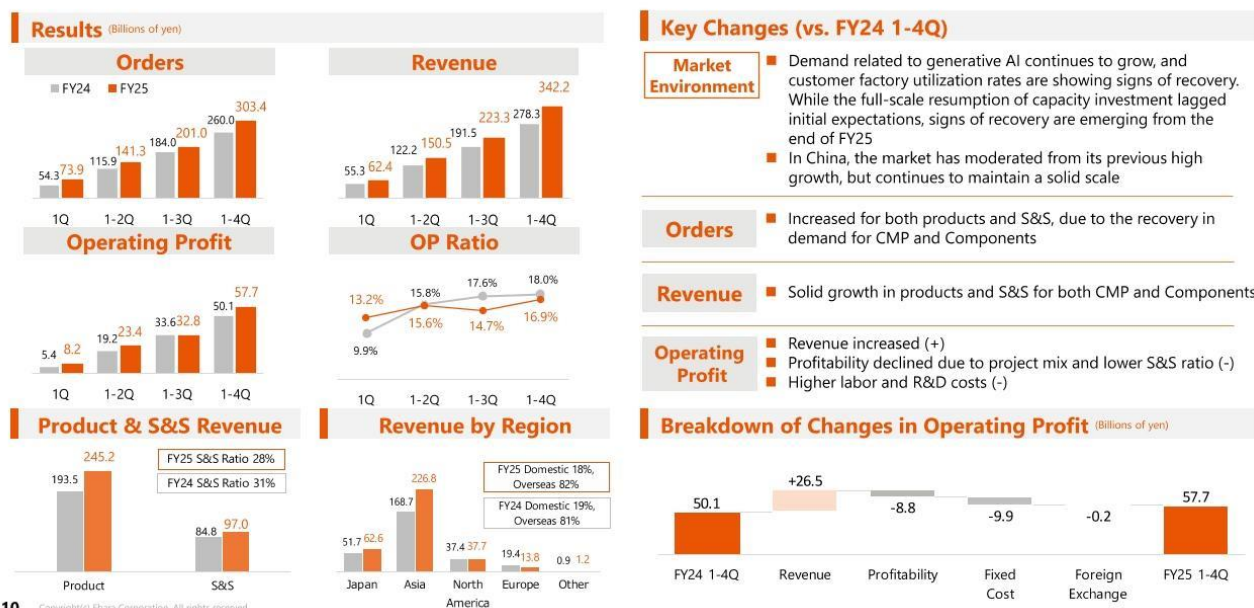

In the bar graph on the left, the upper row shows FY2025 and the lower row shows FY2024. Regions with significant increases in revenue are Taiwan, Korea, and other Asia. Largely due to the influence of precision machinery. Revenue in other regions are as shown in the slide.

- 1. FY25 Summary of Results
- 2. FY25 Results by Segment
- 3. FY26 Forecast
- 4. Appendix

From this point onward, I will begin to explain the results by segment.

2. FY25 Results by Segment

Precision Machinery

Page 10 is the precision machinery segment. Orders, revenue, and operating profit all increased from the previous fiscal year. In the semiconductor market, demand for generative AI is expanding and some factory utilization rates are improving at major global customers. The full resumption of investment in increased production has been slower than originally anticipated, but some recovery has been seen since the end of FY2025.

The Chinese market has maintained a certain market size, although it has calmed down somewhat compared to the previous momentum. Orders and revenue increased for both products and service & support (S&S) due to the recovery of demand in both the CMP and component markets.

Overall operating profit increased due to a large revenue growth effect and a lower deal mix and service & support ratio, which offset the decline in profitability.

2. FY25 Results by Segment

Precision Machinery Quarterly Trends

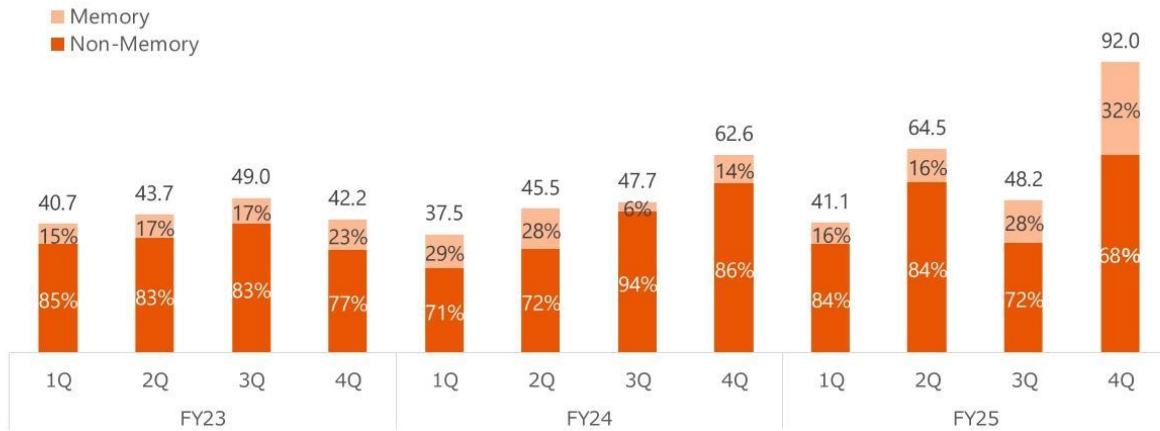

Page 11 shows the quarterly trends of orders and revenue in overall precision machinery, components, and CMP. As I mentioned earlier, orders received in 4Q increased significantly on the back of increased investment in production by major global customers. Revenue increased significantly due to the concentration in 4Q of the acceptance inspection of CMP projects that had been partially delayed.

Precision Machinery Quarterly Product Revenue Trends by Application

Revenue (Billions of yen)

*Memory and non-memory classifications are based on internal definitions

Page 12 shows the quarterly revenue trend of the precision machinery segment, showing the composition ratios of memory and non-memory among the products. In H1 of FY2025, logic/foundry accounted for the majority of the sales mix, but in H2, the memory ratio rose to around 30%. This is due to a recovery in demand for DRAM, including HBMs.

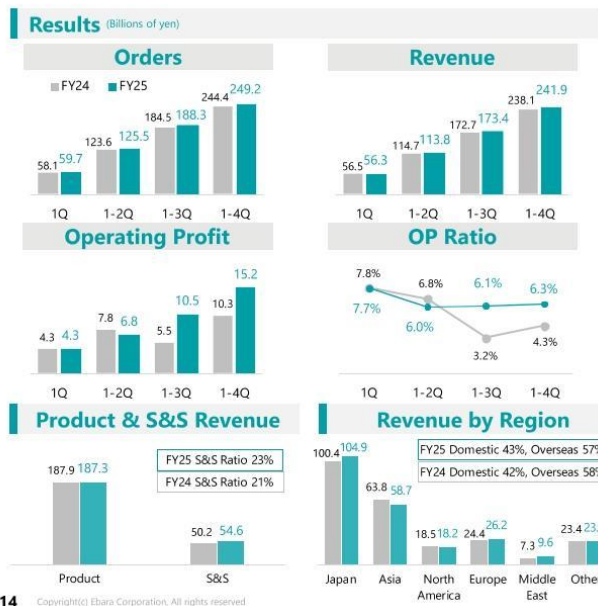

13 Copyright© Ebara Corporation. All rights reserved.

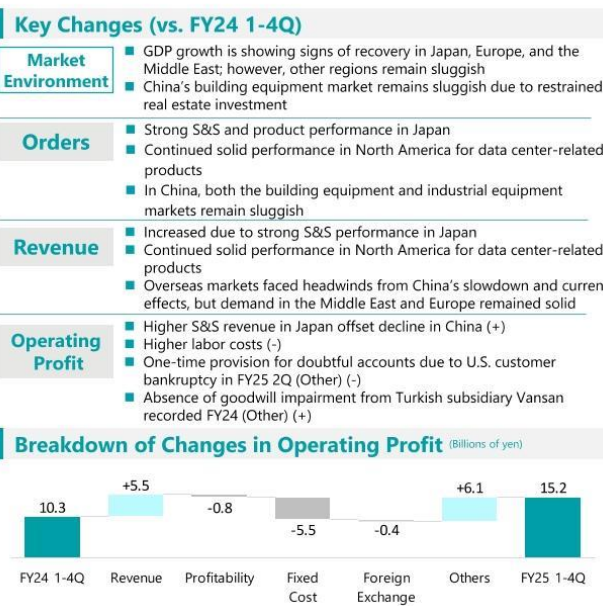

Page 13 is the energy segment. Orders received decreased from the previous fiscal year. Although revenue increased, operating profit decreased. Regarding the market environment, oil prices in the downstream market and customer investment sentiment in LNG projects in North America are recovering.

However, orders received were lower than in the previous year due to declines in both product and service & support. On the other hand, revenue increased due to strong growth in service & support, despite a decrease in revenue from products.

Operating profit decreased due to an increase in fixed costs and the absence this fiscal year of gains on the sale of land and other items recorded in the previous fiscal year, despite the effect of increased revenue.

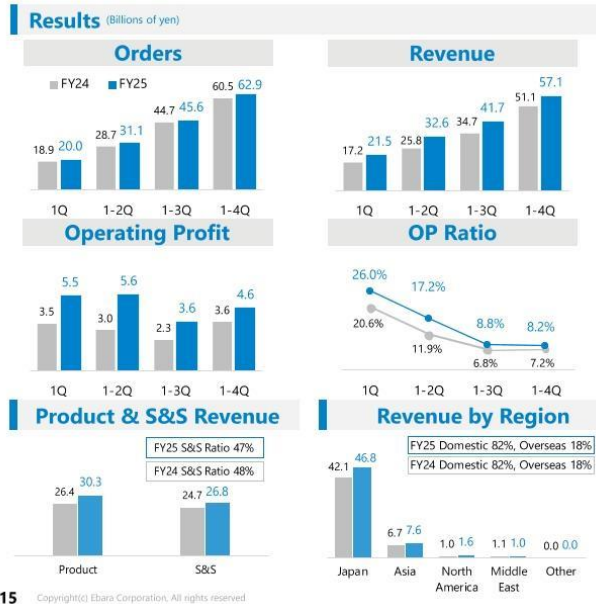

14 Copyright© Ebara Corporation. All rights reserved.

Page 14 is the building service and industrial segment. Orders, revenue, and operating profit all exceeded those of the previous fiscal year. GDP growth is recovering in Japan, Europe, and the Middle East, but weakening in other regions. Against this backdrop, orders decreased overseas, but were covered by domestic service & support, resulting in an overall increase. Overseas, orders for pumps for data centers in North America remained strong, but orders declined in China.

Revenue increased in Japan due to strong revenue from service & support. Overseas, although the construction equipment market in China was sluggish, sales to data centers in North America and sales in the Middle East and Europe were strong. Operating profit increased due to the strong domestic S&S business and the absence of goodwill impairment losses recorded in the previous year, despite the impact of lower sales in China and the provision of allowance for doubtful accounts. Excluding one-time factors, operating profit was unchanged.

2. FY25 Results by Segment
Infrastructure

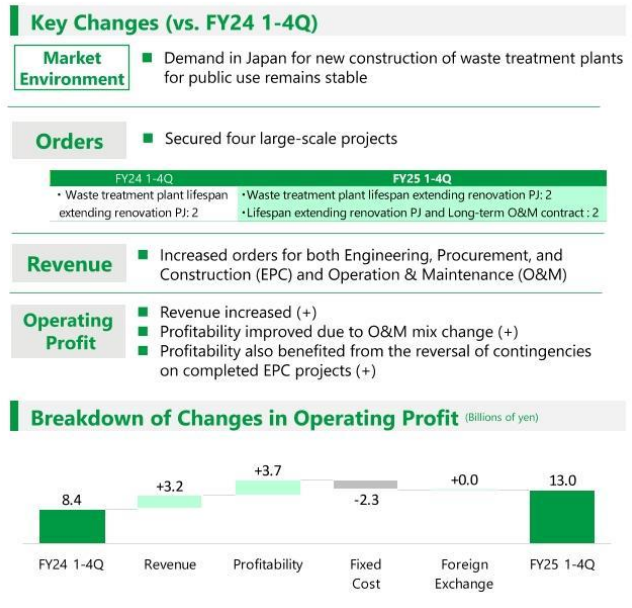

15 Copyright(c) Ebara Corporation. All rights reserved.

Page 15 is the infrastructure segment. Orders, revenue, and operating profit all exceeded those of the previous fiscal year. In Japan, demand for renewal and repair of pump facilities continues to be strong due to the five-year accelerated national land resiliency measures.

In Japan, we received orders for several large-scale projects, and overseas, we received orders for large-scale water infrastructure projects in North and South America. Both revenue and operating profit increased due to the steady digestion of an abundant backlog of orders.

Page 16 is the environmental solutions segment. Orders, revenue, and operating profit all exceeded those of the previous fiscal year. Orders received were significantly higher than in the previous fiscal year due to the receipt of four large orders for life extension and long-term comprehensive projects. Revenue increased in operations & maintenance, mainly from life extension and maintenance projects. Operating profit increased mainly due to a change in the mix of operations & maintenance and the return of contingency for completed EPC projects.

This is the end of the explanation of the results for FY2025.

1. FY25 Summary of Results
 2. FY25 Results by Segment
3. FY26 Forecast
 4. Appendix

Hosoda: From this point forward, I will be explaining our financial forecast for FY2026.

3. FY26 Forecast

Business Environment Overview by Segment

| Segment | Primary Target Markets | Market and Regional Trends | EBARA's Market Outlook FY26 (1-year period*) |
|-------------------------------|---|--|---|
| Precision Machinery | Semiconductor manufacturing | <ul style="list-style-type: none"> Overall, the market expansion trend is expected to continue, driven primarily by generative AI Investments in logic/foundry and memory are projected to increase Customers' factory utilization rates remain strong, particularly for advanced devices | Global Wafer Fab Equipment: More than 10% growth |
| Energy | Oil and gas New energy Power facilities | <ul style="list-style-type: none"> Products: Demand in the petrochemical market is expected to remain firm, mainly in North America, Asia, and the Middle East, although a slowdown is anticipated to continue in China. In the LNG market, customers' investment appetite in North America will continue to recover, and steady growth is expected. Service: Maintenance demand is expected to return to normal levels Decarbonization-related Markets: commercialization will continue progressing, particularly in areas such as ammonia, hydrogen, and CCUS, etc. | Global LNG: Growth in 6%-range Ethylene: Growth in 3%-range |
| Building Service & Industrial | Building and industrial equipment | <ul style="list-style-type: none"> Europe: Capital investment will remain sluggish due to rising construction and labor costs China: Building equipment and industrial markets will remain sluggish United States: Although tariff policies and other factors may have an impact, demand for data centers is expected to increase | Overseas Growth in 2%-range |
| | | <ul style="list-style-type: none"> Building Equipment Market: Continued project delays due to persistently high construction costs and labor shortages Industrial Market: Demand for capital investment will remain steady | Japan Remain stable |
| Infrastructure | Water-related infrastructure Ventilation | <ul style="list-style-type: none"> Water demand in Asia will continue to rise along with population growth, and the refurbishment of aging facilities in North America will continue Flood damage is rising globally due to climate change, supporting strong demand for drainage pumps, particularly in Southeast Asia and the Middle East | Overseas Growth in 4%-range |
| | | <ul style="list-style-type: none"> Stable outlook due to the national land resiliency plan and other factors | Japan Remain stable |
| Environmental Solutions | Solid waste treatment | <ul style="list-style-type: none"> Demand for new construction for public waste treatment facilities will remain roughly in line with typical annual levels Rising demand for life extension projects for aging plants | Japan Remain stable |

Page 18 describes our perception of the business environment by segment for FY2026.

First, for precision machinery, we assume that the Wafer Fab Equipment (WFE) market growth will be on an expansion trend of 10% or more. Demand for semiconductors for generative AI continues to grow, and we anticipate increased customer investment in both logic/foundry and memory. We expect that our customers' factory utilization rates will also remain at very high levels, especially for advanced devices.

Next is the energy market. In the energy sector, we expect a growth rate of about 6% in the important LNG market and about 3% in the ethylene market. In the product field, we still see a slowdown in China, but in the LNG market, especially in North America, customer investment sentiment is recovering, and we expect the overall market to remain firm.

Next is the building service and industrial segment. We expect growth of about 2% globally. We expect the data center market to continue to be strong, mainly in North America, although there are differences by region. In Japan, the market is expected to remain flat from the previous year, partly due to the impact of high construction costs.

The domestic market, which the infrastructure and environmental solutions segment faces, is also expected to remain stable at about the same level.

3. FY26 Forecast

Consolidated

Exceed ¥1 trillion in orders and revenue for the first time

19 Copyright(c) Ebara Corporation. All rights reserved

Based on the recognition of the business environment I have just described, here is our Group's forecast for FY2026.

Orders and revenue are planned to exceed the JPY1 trillion mark for the first time in both cases, at JPY1.07 trillion and JPY1.02 trillion, respectively. Operating profit is expected to be JPY125 billion, an increase in both revenue and profit. Operating profit ratio, ROIC, and ROE are projected to be 12.3%, 12%, and 16.5%, respectively.

* From FY26, a portion of the hydrogen business that was handled as a Corporate Project will be transferred to the Energy segment.

On page 20, I will explain our forecasts for each segment.

Orders are expected to increase for precision machinery, energy, and building service and industrial. Particularly in precision machinery, we plan to capture the recovery in the market and increase orders by more than 30% over the previous year. Revenue is planned to increase due to an increase in orders in precision machinery, and by capturing firm domestic and overseas demand in building service and industrial.

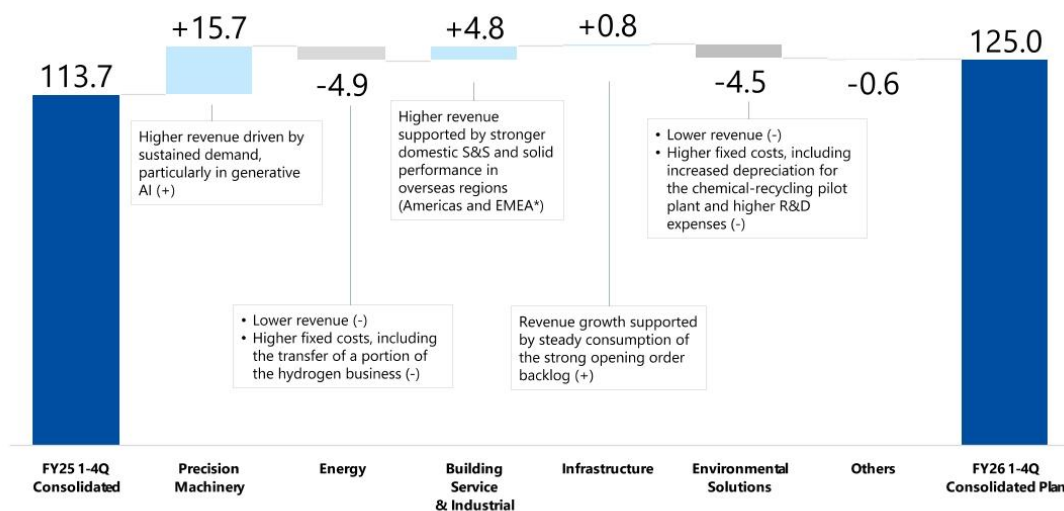

In the hydrogen-related business, which we have been promoting as a corporate project, we are reviewing a part of the structure starting from this fiscal year, FY2026. Some of the organizations previously developed as SBUs (Strategic Business Units) and under the Corporate jurisdiction have been integrated into the energy segment. We have changed our business structure so that we can operate more efficiently by conducting each process from order receipt to shipment within the energy segment.

Operating profit will be explained on the next page.

Breakdown of Changes in Operating Profit

While continuing to pursue growth and infrastructure investments strategically, we expect operating profit to reach its highest level on record

(billions of yen)

21 Copyright© Ebara Corporation. All rights reserved.

*Europe, the Middle East, Africa

This figure explains the factors for the increase or decrease in operating profit from JPY113.7 billion for the finished fiscal year to JPY125 billion for the projected operating profit for FY2026.

We anticipate precision machinery to be the segment that will contribute the most to operating profit this fiscal year. In the building service and industrial segment, operating profit is expected to increase due to strengthened service & support in Japan as well as overseas sales contributions.

In the energy and environmental solutions segments, operating profit is expected to decrease. In the energy segment, in addition to a decrease in sales, we expect a decrease in profit due to an expected increase in fixed costs as a result of the transfer of a portion of the hydrogen business from the corporate segment to the energy segment, as mentioned earlier.

The environmental solutions segment is expected to see a decrease in operating revenue due to the impact of higher than usual operating profit in FY2025 due to one-time factors, as well as an increase in depreciation and R&D expenses.

Dividend per Share Trend

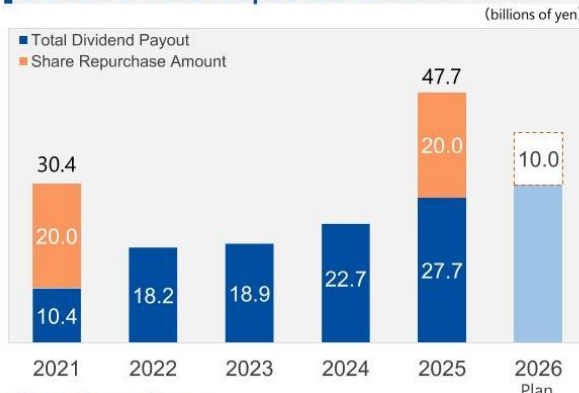

Dividend Policy

We aim for a consolidated payout ratio of 35% or higher, with dividends determined in line with performance for the fiscal year

- FY25 dividend forecast: ¥59 (up ¥4 from FY24)
- FY26 dividend plan: ¥66 (up ¥7 from FY25)

Dividend and Share Repurchase Trends (Cash-flow basis)

Share Repurchases

Implemented for shareholder returns and to optimize the level of shareholders' equity

- FY25: Conducted share repurchases totaling ¥20 billion (5.47 million shares) of our own shares. We plan to cancel 5 million shares on February 27, 2026 representing 1.08% of the total number of shares outstanding as of the end of January 2026.
- FY26: Set a share repurchase limit of up to ¥10 billion

Page 22 is about shareholder returns. With regard to dividends, we have maintained a policy of a consolidated dividend payout ratio of 35% or more. The annual dividend per share for FY2025 will be JPY59 per share, an increase of JPY4 per share over the previous year, and an increase of JPY3 from the previous forecast.

In FY2026, the current fiscal year, we plan to pay an annual dividend of JPY66 per share, an increase of JPY7 over FY2025, based on our plan to increase profits.

The Company repurchased JPY20 billion of its own stock last fiscal year, which was completed during the fiscal year. The Company has resolved to retire these treasury shares. At the same time, the Board of Directors today approved a resolution to establish a new share repurchase limit. The maximum amount of this acquisition limit is JPY10 billion, and the period is from today until the end of December of this year. We will strive to increase shareholder value over the medium to long term while maintaining an appropriate level of equity capital.

That's all from me. We would be happy to answer any questions you may have.
