

Production and Rollout of the Flood Response Manual to Support Rapid Recovery

1. Overview

A lack of reliable information after a flood can cause restoration delays and increase the risk of contractor fraud. To support affected homeowners, EBARA CORPORATION collaborated with Professor Nakaya of Shinshu University to publish the "Residential Flood Response Manual."

Available in both an "Overview" and a "Detailed" version, the guide covers everything from daily emergency prep to task priorities, step-by-step recovery actions, and cost estimates—helping disaster victims make informed decisions without delay.

2. Distribution Record

EBARA CORPORATION published the Overview Version of the 'Residential Flood Response Manual' in 2024, followed by the Detailed Version in 2025."

■ FY2025 (1 Year)
